

BACHELOR OF AEROSPACE ENGINEERING WITH HONOURS

ABOUT US

The Department of Aerospace Engineering was founded in 1996 to support the development of national aerospace industries as proclaimed in the National Blueprint for the Development of the Aerospace Industry in Malaysia. For these reasons, the Bachelor of Aerospace Engineering was introduced that year which emphasis on aeronautics, and astronautics engineering courses.

Astronautics Engineering

Orbit mechanics, space environments, estimation and control of height, telecommunications, aerospace structure, and rocket propulsions.

Aeronautics Engineering

Aerodynamics, aerospace material, aerospace structure, propulsion, flight mechanics, aircraft stability and control.

AREA OF EXPERTISE

- Aerodynamic, heat Transfer & Propulsion
- Aerospace Materials and Structure
- Aerospace Vehicle Control & Navigation
- Aerospace Vehicle Design

ADMISSION REQUIREMENTS

Fulfil the University General Requirement and Specific Programme requirements:

- A minimum CGPA of 2.8
- A minimum of Band 3 in MUET
- OR Credit in English Language subject at SPM level
