

**DEPARTMENT OF CHEMICAL & ENVIRONMENTAL ENGINEERING
FACULTY OF ENGINEERING
UNIVERSITI PUTRA MALAYSIA
RISK ASSESSMENT**

This form must be completed by a competent Assessor for any procedure/system of work carried out by an undergraduate, postgraduate, postdoctoral worker or visitor **before** an attempt is made at the procedure/system of work. Reference should be made to the instructions for making a Risk Assessment in the current Dep. of Chemical & Environmental Engineering Safety Manual

1. Name of Experiment:

Different experiment will required different Risk Assessment Form

2. Experiment being assessed (Description of experiment):

3. Known or expected hazards associated with the activity:

4. The risk of injury and its severity likely to arise from these hazards:

5. Who is at risk?

6. Measures to be taken to reduce the level of risk:

7. Training prerequisites:

8. Level of risk remaining:

9. Emergency action:

10. References if any:
